Projects

- **College Management System(in PHP, MySQL)**
Description:
Led the development of a robust College Management System using PHP and MySQL, enabling seamless management of faculty, students, and administrative tasks. Overcame the challenge of designing a user-friendly interface that accommodates various user roles. Implemented role-based access control to ensure data security and privacy. Integrated Ajax for dynamic updates and improved user experience. Enhanced system functionality by implementing features for assignment uploading, student attendance tracking, and user profile management. Collaborated with a team to meet project deadlines and ensure smooth deployment.
- **EliteWear E-commerce (PHP- Laravel)**
Technology Stack:
PHP (Laravel), HTML/CSS, JavaScript, MySQL

Project Description:
Developed a fully functional, responsive e-commerce web application for online clothing retail, designed to provide a seamless shopping experience for users and robust administrative controls for the backend. The platform includes customer and admin modules, secure payment gateway integration, real-time inventory management, and data analytics.
